

Let's get started...

It only takes few minutes to design, publish and manage APIs in WSO2 API Manager

I Have an Existing
API

I Have a SOAP
Endpoint

Design new REST
API

Design new
WebSocket API

Use an existing API's endpoint or the API
Swagger definition to create an API.

One more thing...

We went ahead and specified wildcard resource (/*) for you.
You can change them later if you want.

GET	/*	Summery	
POST	/*	Summery	
PUT	/*	Summery	
DELETE	/*	Summery	
PATCH	/*	Summery	

We will take you soon to API listing, unless you want to make changes...
